% Rule to infer pollution  
infer_pollution :- known(cloudy_water), known(bad_smell), assert(known(polluted)),  
write('Water is polluted'), nl.  
start :- assert(known(cloudy_water)), assert(known(bad_smell)), infer_pollution.
```

A screenshot of the SWI-Prolog console window. The window has a dark gray title bar with the text "SWI-Prolog console" and a small icon on the left. Below the title bar is a light gray menu bar with the items "File", "Settings", "Tools", "Debug", and "Help". The main area of the window is black with white text. The text shows the welcome message, version information, and the results of several Prolog queries. The queries are numbered 28, 29, and 30. The results of the queries are "true." or the output of the query. The cursor is at the end of the third query.

```
SWI-Prolog console
