

```
:- dynamic known/1.  
% Rule to infer fire  
check :- known(smoke), known(heat), assert(known(fire)), write('Fire Alert!'), nl.  
% Start rule  
start :- assert(known(smoke)), assert(known(heat)), check.|
```

A screenshot of the SWI-Prolog console window. The window has a dark gray title bar with the text "SWI-Prolog console" and a small icon on the left. Below the title bar is a light gray menu bar with the items "File", "Settings", "Tools", "Debug", and "Help". The main area of the window is black and contains white text. The text includes a welcome message, a disclaimer, instructions for help, and two Prolog queries with their results. The first query is "consult(['c:/Users/hp/Downloads/EXP 9_2.pl'])" which returns "true.". The second query is "start." which also returns "true." and prints "Fire Alert!". The third line shows "28 ?-" followed by a red triangle cursor.

```
